MINING NEWS

Successful Men Acquire the United Verde Extension Property in Arizona.

J. W. Twiggs is working 20 mon in the Old Davis mines, in Yavapai county, near Scnator, Ariz., and is taking out shipping ore.

A rich streak of ore has been struck by George Hartman and July mine, situated a mile from Bobletts ranch on, Lynx creek. The ore is said to run as high as \$100 silver per ton.

In the Venezia mine, Yavapai county, Ariz., operated by J. B. Tomlinson, of El Paso, and associates, connection is being made between the tunnel and the fret level in the shaft, and a wing that is sinking shows a splendid ore streak gradually willening. Ore was recently encountered in this mine running 12 to 12 cunces gold a ton, which is being sacked for shipment. Besides this, there is a big streak of milling ore exposed throughout the entire level.

U. N. Hall Again Operating.

U. S. Mall Again Operating. The U. S. Mall Again Operating.
The U. S. mine in Copper unsin is operating and will ship a car of Head-zine ore, found in new working. Twenty-five years also it produced much high grade lead sliver ore.
In the Fortune mine in Upper Big Hug district, Ariz, the tunnel has penetrated a continuous ore shoot for 500 feet.

Dave Morgan has recently struck a

Dave Morgan has recently struck a four-foot pay atreak running \$60 a ton, in his mine in Castle croes, at a depth of 49 feet in the shaft.

It is stated that the Bagdad company drilled a hole on one of the Mesa claims in the Eureka district. Yampai county, to a depth of 490 feet, passing through the deposit of copper ore, which at this point is 70 feet thick.

The syndicate that has taken over

copper ore, which at this point is 70 feet thick.

The syndicate that has taken over the United Verde extension property in the Jerome mining district, Yavapai county, Arlz, is composed of James Douglas at the head, for many years connected with Phelips, Dodge & company; Chester A. Congdon, George E. Tenor and James Hoatson, director of Calumet & Arizona; John D. Ryan, president of the Amalgamated Copper company; Henry Hoveland, former president of the Live Oak Development company; George Kingdon, general superintendent of Old Dominion company, and Arthur James, a director of Phelps, Dodge & company. This strong syndicate has also taken over the Jerome-Verde Copper mine, under outlend.

Jerome-Verde Copper mine, under oution.

The new company will, it is reported, develop certain spots in the old, workings before deciding where it will do its decisive work. From the start it will put as many men at work as can be handled to advantage.

With the three old companies—Jerome Oil company, Tempe-Yerde company and the Camp Verde company—working, and with other companies with machinery on the ground and on the way, the outlook for the district is most promising. At the Cleopatra mine development on the recent strike continues and ore is being mined from the big stope north of Holl tunnel. Progress is being mide unwatering the Haynes mine. Development is continuing from the 1460 foot level of the Arkansas and Arizona.

It is reported that H. C. Smith, said to represent the Utah Copper company of Sait Lake City, has been in the Patagonia district. Ariz, examining 42 mining claims belonging to Ramsdale, lying between Harstaw and Duquesne. The Ramsdale holding is a large low grade porphyry copper or steam shovel premised to the present the United Copper and inconsistent. Fine exerc of lumber and

ning timbers arrived last week at Patagonia, and soon a carford of tim-ber a day will be used there.

PIONEER ARIZONA MINER DIES. Kingman, Aris, Jan. 4.- James F. Carter, one of the ploneer mining men of Mohave county, died last week at his home in Kingman. He discovered the well-known Carter mines in the Gold Road section, and was head of the Carter Gold Mines company. Carter had lived in Mohave county more than if years.

I was Fat. Uncomfortable, Looked Old, Felt Miserable, suffered with Rheumatism Asthma, Neuralgia. When I worked or walked, I puffed like a Porpolse. I took every advertised med-leine I could find. I Starved, Swested, Exercised, Doctored and changed cil-mate but I ruined my digestion, felt like an invalid but steadily gained weight. There was not a single plan or ding that I heard of that I did not try. I failed to reduce my weight. I dropped scelety, as I did not cure to be the butt of all the jokes. It was embarrassing

SOMETHING HAD TO BE DONE I began to study the cause of FAT. When I discovered the cause I found the remedy. The French Method gave me an insight. I improved on that Removed the objectional features, added more pleasant ones, and then I tried my plan on myself for a week. It worked like Magic. I could have SCREAMED WITH JOY

at the end of the first week when the scales told me I had lost ten pounds by my simple, easy, harmless, Drugless Method. It was a pleasure then to conmy simple, easy, harmless, Drugless Method. It was a pleasure then to continue until I regained my normal self in size. I feel fifteen years younger. I leek fifteen years younger. I leek fifteen years younger. I leek fifteen years younger. My Double Chin has entirely disappeared. I can walk or work now. I can climb a mountain. I am normal in size. I can weigh just what I want to weigh. I man master of my ewn body now. I did not starve, but ate all I wanted to. I did not take Swear Baths. I did not Drug. I used no Electricity, or harmful exercises, but I found the Simple, Sane, Common Sense WAY of reducing my weight and I applied it. I have tried it on others. My Doctor says I am a perfect picture of health now. I am no longer alling. I am now a happy, healthy woman. Now I am going to help others to be happy. I have written a book on the subject. If you say a the present supply last, it will tell you all about my Harmiless, Drug-less Michod. To all who send me their name and address I mail it FREE, at long as the present supply last, it will save you Money. Save you from Starration Diets. Harmful Exercises, possibly save YOUR LIFE. It is yours for the asking without a penny. Just send from name and address. A Postal Card will do and Fill be glad to send it so that you can quickly learn how to reduce yourself and be as happy as I am. Write today as this advertise-ment may not appear again in this paper.

MANY ARE DOING ASSESSMENT WORK

Much Activity in Patagonia District, and Regular Shipments Are Made by a Number of Mines

Patagonia, Ariz, Jan. 4.—During the last few days the streets of Patagonia have been filled with pack outfits of miners starting out to do assessment

work.
Shipments from the Three R mine continue steadily at the rate of about 110 tons per day.
The Blue Eagle, in Alua Guich, is improving with depth, and another carload of ore is ready for shipment. The return for the first carload was highly satisfactory. Crittenden & Ewing, on their lease about three miles west of the Three R, are making good headway and opening up very promis-

west of the Three R, are making good headway and opening up very promising ground.

Shipments from the Duquesne mine are coming in regularly. Work on the Chief is going ahead steadily, under the management of W. H. Worthington, who has also opened up an assay office in town.

Dr. Hartmeyer, manager of the Bland Mining company, is pushing develop-Mining company, is pushing develop-ment, with every indication of good

results.

J. N. Kellogg, operating the Blue Lead group, is driving two tunnels and has a lot of high grade ore sacked up. This has all come from a small side vein and does not touch the main

RICH COPPER MINE

IN WICKENBURG FIELD Phoenix, Ariz, Jan. 4.-Offers for the property of Andrew Kozik and George Horst, on which Kozik made a sensational discovery a few months

igo, have been made by the Guggenheim interests, Monarch Mining & Smelting company and Swansea Consolidated Gold & Copper company.

Konk and Horst hold four claims seven miles east of Wickenburg. For many years they were held by Frank Ryland, a ploneer miner of that district. Ryland never did anything with the property and when he died his wife gave it up. Kozik then filed on four claims for himself and his partner. interests, Monarch Mining &

Note:

While prospecting about the claims
Kuzik shoveled some sand out of the
bottom of a wash and uncovered a
four-foot ledge running 12 per bent
copper and \$14 gold to the ton, right
on the surface. The formation is quartz

and perphyry.
Only a 10-foot shaft has been put
down on this vein, but it is all ore.
The vein has been traced a considerable distance.

There are five parallel veins on the

Korik group and all carry values. There is also one cross vein that runs \$18 gold to the ton.

gold to the ton.

This group is a mile and a half southwest of the Monarch mine, and the Monarch people are anxious to get held of the property to supply fluxing ore for their new smeller. The Swansea company wants to ship the ore to the Swansea smelter for flux. Recently James Kruttschnitt of the Guggenheims, looked over Kozik's holdings and made him a tentative offer,

NEW COMPANY WILL OPERATE ERNESTINE

E. W. Wayne Returns from New York, Where He Put Through Big Deal Affecting Mogolion Properties

Affecting Mogolion Properties

Mogolion, N. M., Jan. 4.—R. A. Wayne, has returned from New York after putting through one of the biggest mining deals in the mining annals of New Mexico. Through his efforts a new company was recently organized which took over the Ernestine and Maud mining companies of Mogolion and will operate both properties on a much increar scale than before. The Ernestine company is the largest gold producer in New Mexico and has been a dividend payer for several years. Recently the motive power has been changed from fuel burning to internal oil combustion engines, and the capacity of the mill increased.

The new company will proceed at

MINING NEWS

Monterey, Mex., Jan. 4.—In all the in the oil industry for the reason that forld there is no greater manifesta- in that same coast region there is another well situated in the Potrero world there is no greater manifestaof nature's wealth-producing power than exists in the remote settlement of Juan Casiano, in the state

tlement of Juan Casiano, in the state of Veracruz, in the east coast region of Mexico. This marvet of modern times is an oil well that for \$42 days has been producing at the rate on \$1 worth of oil every four seconds.

Aladdin with his lamp never wrought a greater wonder in the creating of riches by magical means than was accomplished at Juan Casiano on September 1, 1910, when a crew of American well drillers punctured a subterranean reservoir of crude peiroleum. Since that day the well has been flowing without interruption with its gate valve three-fourths closed. Its lts gate valve three-fourths closed. Its production up to this time totals approximately 20,000,000 barrels, valued at \$10,000,000.

Will Flow 190,000 Barrels Delly
What the aggregate of the well's
flow would have been had the mouth
of the S-inch pipe been permitted to
remain wide open is largely conjectural. It is conservately estimated,
however, that the well's capacity is in
excess of 190,000 barrels per day. As
an evidence of the scope and strength
of the pressure that is back of the
oil flow, the fact is cited that when
the well was first brought in the
gate valve was adjusted to a preasure of 290 pounds to the square inch
and that this pressure has not varied
a fraction of an ounce since then.
This is proof it is stated, that the
pressure behind the oil flow is stiff
as great as it was when the strike was while the side vein and does not touch the main body.

Tom Fraser is in town from his camp near the Alto, and reports steady improvement and progress.

The camp was visited by a heavy wind, which demolished a great many houses and tents in the vicinity.

The Mansfield company is increasing its force of men and installing machinery, as well as rehabilitating the camp senerally, with the evident object of permanent operations.

Henry White of Pasadena has established a camp and taken a lease on a group of claims adjoining the Mansfield, and is taking in timber and supplies to shak a shaft and develop the property along permanent lines.

Clark & Feterson, on the American Boy group, are taking out ore regularly and preparing for another shipment.

Donald Miller, of Bisbee, is in charge of operations for the Copper Queen, on the Steechy group, south of the World's Fair.

The Bradford has been taken over by Kansas City interests and the main of the aggregate of the well's aggregate of the well's flow would have been had the mouth of the S-inch pipe been permitted to remain wide open is largely conjectural. It is conservately estimated, however, that the well's capacity is in excess of 190,000 barrels per day. As an evidence of the scope and strength of the valve was first brought in the gate of the years of 290 pounds to the square inch and that this pressure has not varied as fraction of an ounce since then. This is proof it is stated, that the pressure behind the oil flow is still as great as it was when the atrike was made.

Only if the Alice of the well's capacity is in excess of 190,000 barrels per day. As an evidence of the scope and strength of the valve was first brought in the same valve of 290 pounds to the square inch and that this pressure has not varied as great as it was when the atrike was made.

Not a Phenomenal Weil It is not regarded as a phenomenal with the aggregate of the world to remain wide open is largely conjectural. It is conservately estimated, however, that the well's capacity is in exces Will Flow 100,000 Barrels Dolly

MESA MEN TO WORK . TELLURIUM PROPERTY

Los Angeles Syndicate Has Bonded the Fisk and Hichardson Group on Camp Creek.

Mesa, Ariz, Jan. 4.—Col. Fred Bowler and associates have taken a bond on the property of the Tellurium Mining company, in the Maratsai range, aortheast of Mesa. It is said that the bond is for \$199,500.

There are 14 claims in the Tellurium group and there is a good showing of gold, silver and lead ore. If a reexamination and sampling contirms the result of the first examination, systematic development work will be commenced at once. Already \$50,000 has been raised for this purpose. The principal stockholders of the Tellurium company are Dr. A. J. Chandler and other residents of Mesa.

C. N. Sears has bonded the H. H. Bowman quicksilver property in the same district. Active development work must commence within 90 days. Ten months is the life of the bond. Quicksilver is found in several parts of the Mazatral range. On the Bowman property there are bands and seams of quartz carrying quicksilver, extending through the schist. This area is 1.000 feet wide and 5,000 feet long. The formations and conditions indicate a large cinnabar deposit.

A Los Angeles syndicate has bonded the Fiske & Richardson group, near the old Rackensack mine, 50 miles north of Phoenix, on Camp creek. The property has a small mill and the workings have produced some very good ore. By tunneling it is possible to get 500 or 700 feet under the apex. It is said that the bondholders will soon begin development.

Last week the Red Rover mine, 50 miles north of Phoenix, shipped another carload of high grade cre to one of the Douglas smelters. The ore was extracted from a raise being made from the third level. Another force of men has been sent out from Phoenix to begin sinking a new shaft.

Col. George M. Yeakel is installing some new machinery at his silver-copper property, near Payson. Mess, Ariz, Jan. 4 .- Col. Fred Bowler and associates have taken a bond another well situated in the Potrero del Liano field which has a proved capacity of 110,000 barrels per day, but, owing to the lack of facilities for storing and piping its output, the monster is at present hurnessed and only a few thousand barrels per day are permitted to escape from the hole.

Another remarkable feature of this well is that its oil has a gravity of 12 degrees Baume, which places it in the light crude, or higher grade class, while most of the other oil in the Guif coast territory of Mexico is only 12 to 14 degrees gravity.

Already there are in steel tank storage from this well more than 7,000,000 barrels of oil. This enormous quantity is in addition to the daily quantity of fiuld that is marketed.

Holding the Excess Flow
In order to provide for the excess

NEW MILL FOR THE

WICKENBURG FIELD a month the new mill being creeted at the big Blue mine will be turning cut concentrates. Several hundred tons of high grade ore are on the dump awaiting the completion of the concentrator.

awaiting the completion of the con-centrator.

Splendid ore has been opened on the 100-foot level of the main shaft, and a drift is being run from that point. A raise will be made from the drift to the surface, thus starting a new and larger working shaft from which the ore can be delivered to the mill. Prospects are good for an early re-sumption of work at the Interior Min-ing & Trust company's property. J. A. Twitchell, of Pittsburg, president of the company, is now maxing an exam-ination.

the company, is now making an examination.

Resular shipments of concentrates from the Vulture mill are being made through Wickenburg. Good ore is being uncovered steadily.

At the Cunningham Pass mine, near salome, the shaft has been retimbered down to 400 feet. Within a few days the water will be out of that level and a force will be put to work drifting on the ore.

MacDonald & Rutherford have taken a bond and lease on the old Scoorro mine. Soos they will be taking out ore and tunning it through the small mill on the property.

A good showing of ore has just been opened on George H. Ward's Gold Cross group. Five tons of ore were recently shipped from the Gold Cross and the net returns were \$1,500. Sinking will be started on the vein soon.

Dick Wick Hall of Los Angeles will soon start work on his claims, near Salome.

Joe Fuller has been running a little Salome.

Joe Fuller has been running a little mill on the Finance group with good results, since September L. The ore runs about \$78 a ton.

RICH STRIKES MADE IN MINE NEAR YUMA

Yuma, Ariz., Jan. s.—McEntres brothers of Salome have made a big strike ers of Salome have made a big strike in their mine near Salome. At a depth of 175 feet they have encountered a vein running 200 ounces of silver per ton. The new ledge is 20 inches wide and is widening with increased depth. About 14 miles south of Yuma Christ Vaeger of El Paso is reported to have struck a vein of very rich gold ore. The property is in the same district as the famous Fortuna mine, in some low mountains in the desert.

EL PASO MAN ACTIVE IN PECOS VALLEY FIELD

C. R. Troxel of El Puso has gone to Pecos Valley points on business connected with the projected development of the oil "elds around Dayton, Lakewood and Artesia. Mr. Troxel has been working for a long time to induce outside capital to come into the field and undertake its thorough development.

He lately returned from California, where he had been in conference with prominent oil capitalists. The Cali-fornia Oil World of Bakers?eld, Cal., prints the following reference to the visitor:
"C. R. Troxel of El Paso, Texas, who

"C. R. Troxel of El Paso, Taxas, who has just been in California, is one of the men seeking to develop an off the men seeking to develop an off the men seeking to develop an off the state of Chinuahua, Mex. Years ago Mr. Troxel's attention was first drawn to the off prospects south of Ojinaga, the little town inst across the International line from Presidio del Norte, Texas. Through Mr. Troxel, William R. Hearst and James R. Keene were induced to go after oil here and they worked for several years, getting oil but in what quantities it is impossible to say with certainty. Indications were that they had commercial amounts, but they closed down all operations because the field is nearly 100 miles from a railroad. Mr. Troxel has interested himself both around Toyan, Texas, and in the Pecos Valley of New Mexico, in both of which places prospecting is actively under way. He thinks there is a great future for these fields."

MUCH ORE SHIPPED FROM PINOS ALTOS

Pinos Altos, N. M., Jan. 4 .- More ore is being shipped from the Pinos Alton camp, Grant county, N. M. than for many years and the camp is becoming lively. George B. Brown, of Silver City, has secured a five-year lease on the old Manhattan mining property, consisting of a group of eight well developed claims, adjoining the Gillett mine on the north. The property is owned by the Manhattan Gold Mining company, composed of eastern people, and was worked by them from 1887 to 1893, when work was suspended on account of the rapidly increasing percentage of nuc, which then commanded a very low price, besides rendering the ore more complex for smelting. This company had its mill about a mile north of Silver City, where it remained intact until a few years ago, when it was sold and removed. The claims are thoroughly ramified with thousands of feet of shafts and tunnels, the deepest shaft being 500 feet deep and some of the tunnels having a length of 1,500 feet. The property was formerly successfully operated by judge L. P. Deming under a lease with the company, which continued the operation of the mine until the closing down of the Commanche smelter. Excepting for some desultory exploitation work by an eastern company about a year 130, the property mas since remained idle. The ore value in gold and silver ranges from \$18\$ to \$20\$ per ten. In admitted ore rinning from \$9\$ to 40 per company about a year 130, the property nas since remained idle. camp, Grant county, N. M., than for

GOOD COAL FIELD IS LOCATED IN ARIZONA

Prescott, Ariz, Jan. 4.—Sixtern residents of Prescott have received patents to coal land in southern Navajo county, which they filed on in 1989. Each now owns 160 acres of coal land as good as any in the west. One of the fortunate persons is George Merwin, who discovered the Navajo coal fleids in 1885 while fleeing from renesade Apaches. He camped in a ravine one night and, with the inquisitiveness of the trained prospector, broke a cropping within a few feet of the clace where he laid substance was coal. The next day be continued his flight and fild not return to make more extensive observations for a number of years. He made numerous efforts to in the analysists.
